

PROSPECTIVE PSYCHOLOGY

A Project of the University of Pennsylvania and the John Templeton Foundation

Templeton Science of Prospecption Research Awards Request for Applications

Supported by a grant from the John Templeton Foundation, the University of Pennsylvania Positive Psychology Center has established the Templeton Science of Prospecption Awards to advance research the scientific understanding of **prospecption**, or the mental representation of possible futures.

Up to fifteen (15), 22- to 24-month grants averaging \$150,000 will be awarded to researchers worldwide who hold the Ph.D or equivalent, are at the rank of Assistant, Associate, or Full Professor, and have maintained their own independent laboratory for no more than 12 years.

Research topics of interest include, but are not limited to, explorations of the following domains of prospecption: Measurement • Mechanisms • Applications • Improvement • 'Open'

To Apply: Interested applicants should submit a Letter of Intent and a Curriculum Vita by January 1, 2014. The official Request for Proposals and application details for this opportunity can be found on the Prospective Psychology website:
