

INTERNATIONAL SUMMER SCHOOL IN SOCIAL COGNITIVE NEUROSCIENCE (SCoNe)

TRIESTE | JULY 15 - 28, 2013

SCoNe School Structure

Immersed in this intensive two-week program, participants will work alongside faculty members promoting theoretical and practical interactions. SCoNe School will be organized in two modules: Neuroscience of Social Information Processing (social judgment, empathy, stereotyping, prejudice, face perception and emotion), and Neuroscience of Reward (neurobehavioral mechanisms of appetitive motivation and reward, value-based decision making, and the rewarding value of social interaction). Each one-week module will be organized in morning general-overview lectures and afternoon focused-tutorials on methods tied to social cognitive neuroscience.

FACULTY

Nalini Ambady Stanford University, USA
