Providing Social, Emotional,
Behavioral, and Special
Education Services in School

Healthy Practices: Nutrition,
Physical Activity, and
Community and Family
Participation

04/22/2020

HARI SANKAR S

has successfully completed the online, non-credit Specialization

School Health for Children and Adolescents

The courses of this specialization equip learners to manage common health conditions including asthma, allergies, diabetes, and seizures. They learn to manage common behavior conditions such as ADHD and autism as well as learning disabilities and concussion. Upon completion of the specialization, learners will be ready to apply newly acquired skills in the provision of social, emotional, behavioral, and special education services. Importantly, they will also be ready to promote healthy practices such as nutrition, physical activity, and community and family participation in their own school community.
