Athens, central 10434

CAREER OBJECTIVE

As with so many mystics, Alexis karpouzos intuitively know the oneness of cosmic creation and historic humanity as part of all that is and all there isn't. So, the originality of Alexis Karpouzos thought is that it crosses the most diverse fields, the most opposing philosophies, to unite them into an often contradictory and broken whole. Marx and Heidegger, Nietzsche, Freud and Heraclitus, poets and political theorists all come together in the same distance and the same unusual proximity. Alexis karpouzos use Pre-Socratics philosophy and generally the ancient Greek philosophy, as well as the pre-philosophical thinking of

EXPERIENCE

February 1999 - Present

Philosopher

ALEXIS KARPOUZOS - INTERNATIONAL FORUM OF WISDOM,
Athens, central

Alexis karpouzos (Greek : Αλέξης καρπούζος) was born in Athens on April 9, 1967, after attending philosophy and social studies courses at the Athens School of Philosophy and political science courses at the Athens Law School, he continued his studies in psychoanalysis and the psychology of learning. During his studies in Greece he has actively involved in the social, ecologic and occupancy movements. At the same time (starting in 1990), he met Cornelius Castoriadis an Greek-born philosopher and attended his lectures and lessons He was influenced by Castoriadis' attempt to connect philosophy with psychoanalysis and politics in order to gain a new perspective on some of the problems of society during his time. In 1995 he met with Kostas Axelos and was inspired by his post-philosophical thinking and his central concepts, such as the concepts of the play.

January 1999 - Present

The community has contacts and partnerships in 15 countries. More than 12.000 people have participated in the lessons and community's actions.

He founded the international on line lessons:

1. Consciousness and the nature of cosmos
2. The next leap of evolution
3. Soul and cosmos
4. After the human: the wisdom of unity

EDUCATION

February 1989

Degree In philosophy

Athens university, Athens

SKILLS

The Upanishads, the Vedas and Buddhism in India, of Lao Tzu, of Zen Buddhism and the Taoist tradition in China, of the Arab mystics and poets, with their metaphysical religiosity as the metaphysical basis for the interpretation and understanding of the world and existence. At the same time the ancient metaphysics is connect with Hegel's dialectical ontology and with the modern thinking of Marx, Nietzsche, Freud, Heidegger, and others as the interpretive context for understanding the central problems of the technical and scientific world during his time. Novalis, Hölderlin, Rimbaud, Whitman, Eliot and others show the dreamy nature of existence, the transcendence of the Cosmos, welcome the infinity. For Alexis karpouzos the combination of ancient and modern thought creates the holistic experience of universal space-time and the consciousness of the unity. The poetic thought of Alexis karpouzos is a expressions of soul's inner experiences, expression of universality. The inspiring visual images and the symbolic use of language offer a description of elevating experiences of consciousness, a glimpse of higher worlds. The philosophy of Alexis karpouzos speak to the human experience from a universal perspective, transcending all religions, cultural and national

boundaries. Using vivid images and a direct language that speaks to the heart, his philosophy evokes a sense of deep communication with the collective unconscious, a sense of connection to all the creatures of the world, compassion for others, admiration for the beauty of nature, reverence for all life, and an abiding faith in the invisible touch of world. Alexis karpouzos thoughts are often terse and paradoxical, challenging us to break out of the box of limiting beliefs and see things from a new perspective. Above all, Alexis karpouzos continually calls to us to wake up and explore the mysteries within our own selves, i.e the mysteries of universe.
