

4 Courses

Introduction to Cognitive Psychology and Neuropsychology

The neuropsychology of decision making

The Psychology of Emotions: an introduction to embodied cognition

Learning and memory in the brain: a guide for teachers

Sep 12, 2025

Edita Kirkby

has successfully completed the online, non-credit Specialization

The science of mind and decision making

This Specialization offers an introduction to key concepts in cognitive psychology and neuropsychology, including memory, attention, emotion, and decision-making. Learners will explore how brain functions relate to behaviour and how these insights can be applied in educational and real-world contexts. By the end, participants will be equipped to understand and support learning, emotional recognition, and decision processes.

Dr Stacey Bedwell, Dr
Giulia Mangiaracina, Ms
Ginny Smith

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
